Erik András Birkl

Software Engineer

I am a software engineer with more than 2 years of experience with React and Typescript. Most recently, I have been building reliable and clean user interfaces for IP-based banking security systems. I enjoy working in small, agile teams where developers have ownership of the entire process, from design to implementation. Currently, I am looking to advance my technical skills and contribute to international projects. I prefer hybrid or remote work but am happy to commute to the office as required, and I am willing to relocate for the right opportunity.

Work Experience

Frontend Developer

Vidux Informatikai Kft.

IP-based Security Systems & Video Recording Solutions for the Banking Sector

August 2024 to Present

- Building web frontends using React / TypeScript and JavaScript, enhancing user experience and interface design.
- Collaborating with designers through Figma to ensure UI layout parameters meet specifications.
- Participating in agile development processes, improving project delivery and team efficiency.
- Integrated frontend with backend APIs to display live video streams, device status, analytics dashboards and alarm handling.
- Developed and maintained a private npm package for shared UI components, ensuring design consistency and accelerating development across multiple company projects.
- Contributed to backend tasks by writing database migration scripts to help balance team capacity and support project delivery.

Technical Skills Used at Work

- **Languages & Core:** JavaScript, TypeScript, HTML5, CSS3
- **Frameworks & Libraries:** React, Material UI, Jest
- **Infrastructure & Tools:** Git, Jenkins, SonarQube, Keycloak, RabbitMQ, Active Directory
- **OS & Infrastructure:** Linux (Fedora - daily active use), Windows.
- **AI-Assisted Development:** Claude Code, GitHub Copilot
- **Methodology:** Agile (Scrum/Kanban)

Education

BSc in Computer Science Engineering

University of Szeged

Graduated: 2026

Core Competencies

- **UI Design & Frontend:** I don't just implement existing Figma prototypes. When needed, I can design interfaces and user flows from scratch and translate them into clean React components.

- **Cross-Stack Problem Solving:** While my core focus is frontend, I am comfortable stepping out of my comfort zone to handle backend or infrastructure tasks when a project requires it.
